

Create And Configure IBM Cloud Service Create IBM Watson IoT Platform And Device

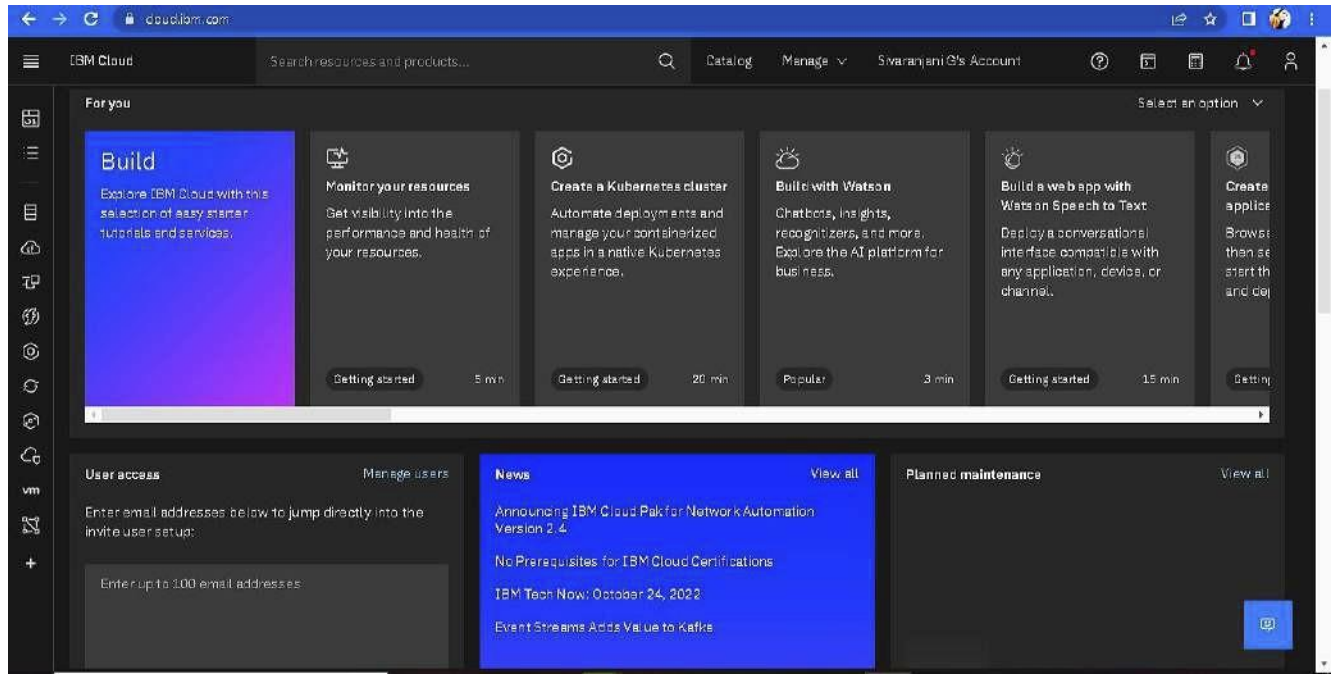

Date	24 October 2022
Team ID	PNT2022TMID53721
Project Name	IoT Based Safety Gadget For Child Safety Monitoring & Notification
Maximum Marks	4 Marks

STEPS

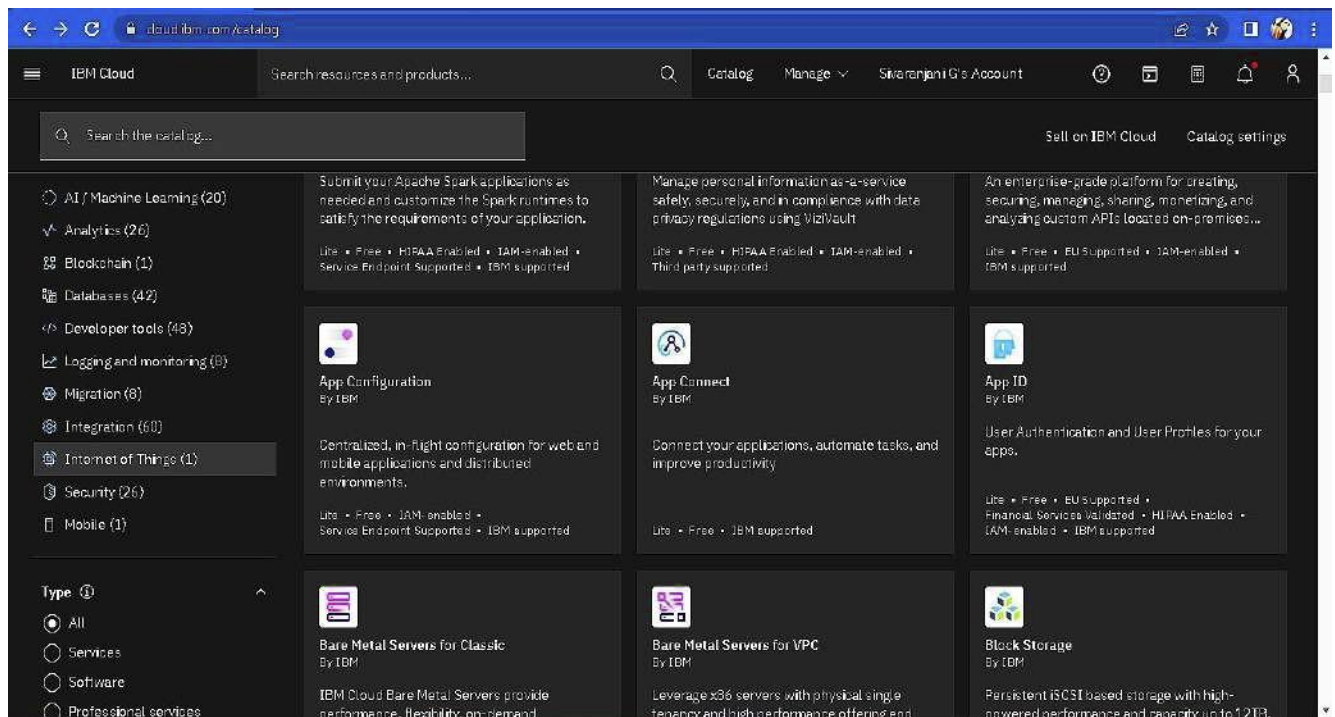

1. Firstly create an IBM cloud account with IBMid and password

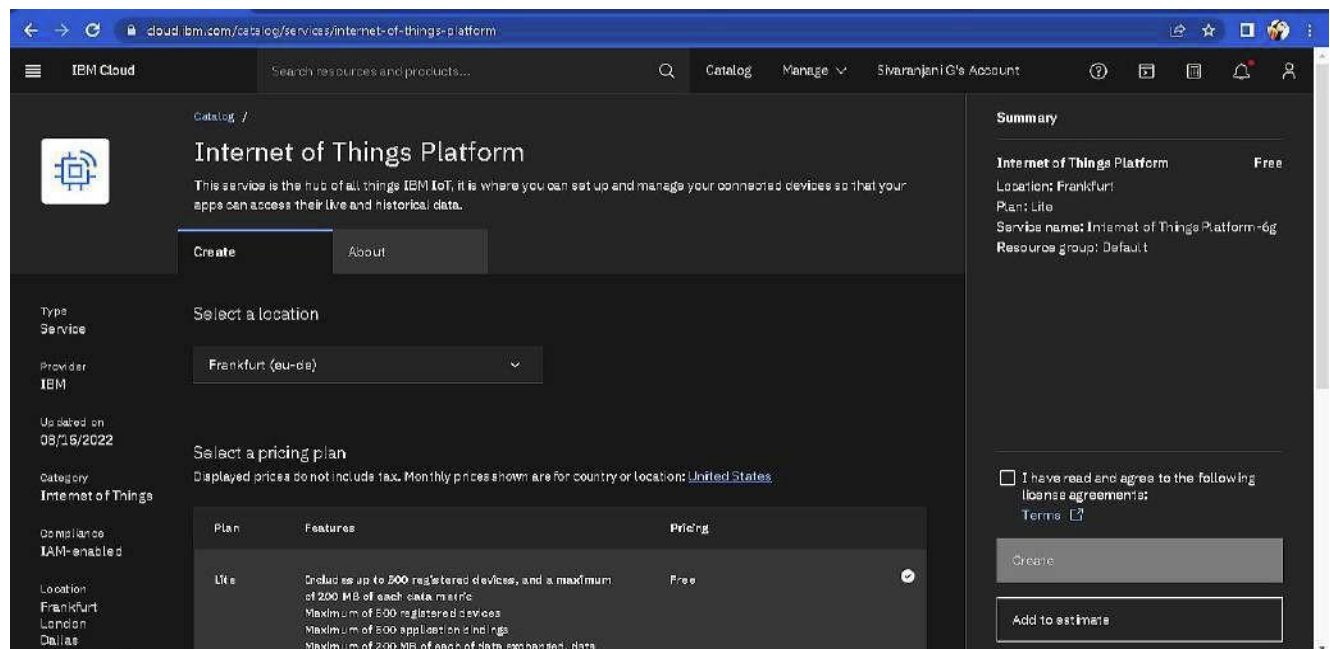

2. Home page of IBM cloud

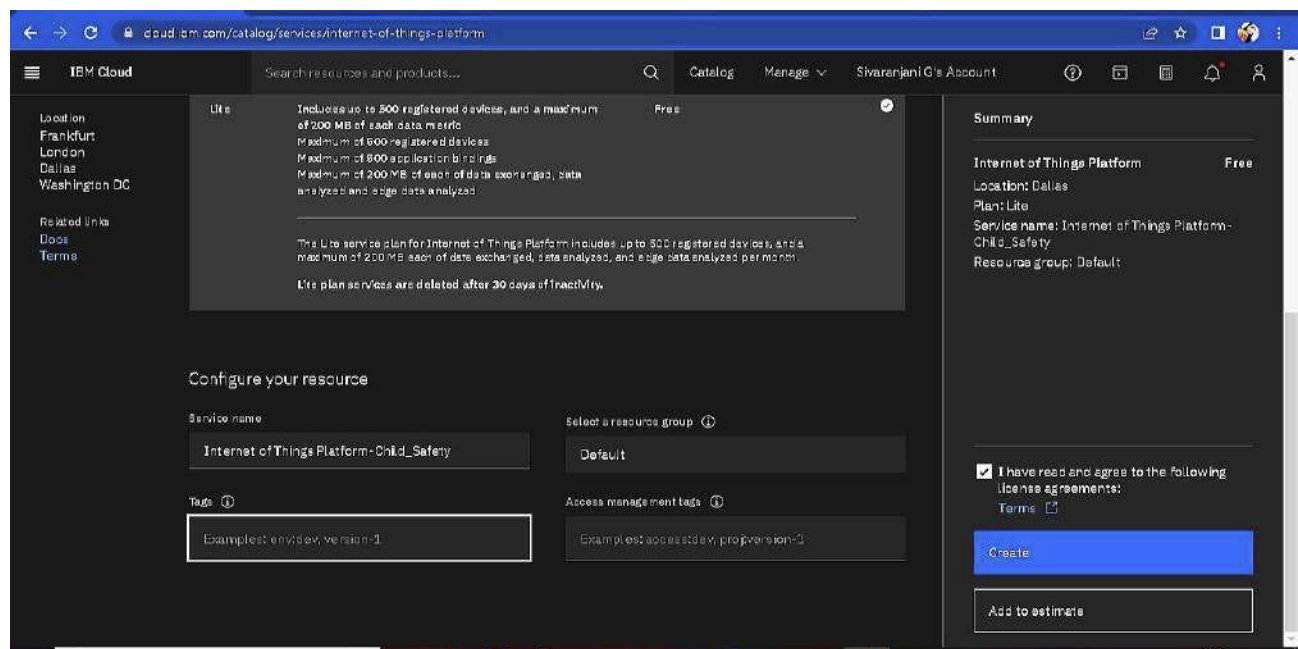

3. Click on the catalog on the top

4. Click on IoT in the category mentioned

5.If already a lite is present delete it else u can't create another

6. Enter the location and in the configure your resource type the service name and choose the plan, tick the agree with it agreements and then click on create

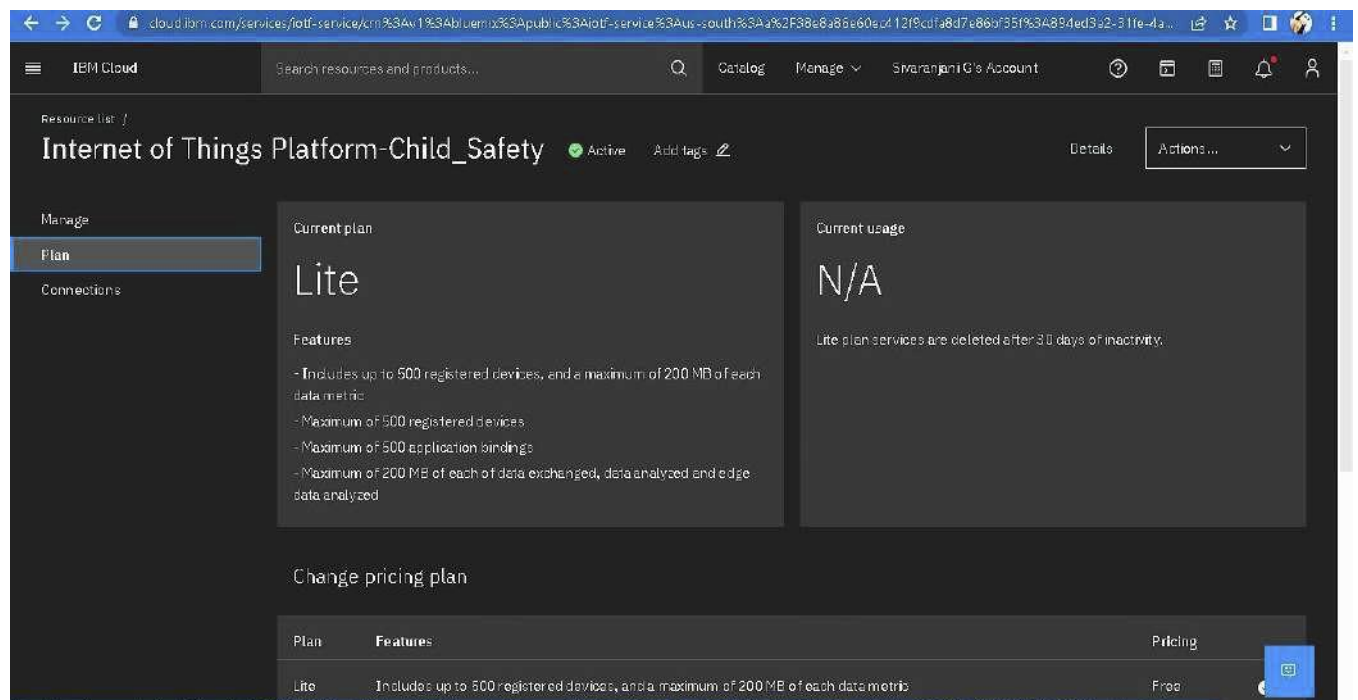

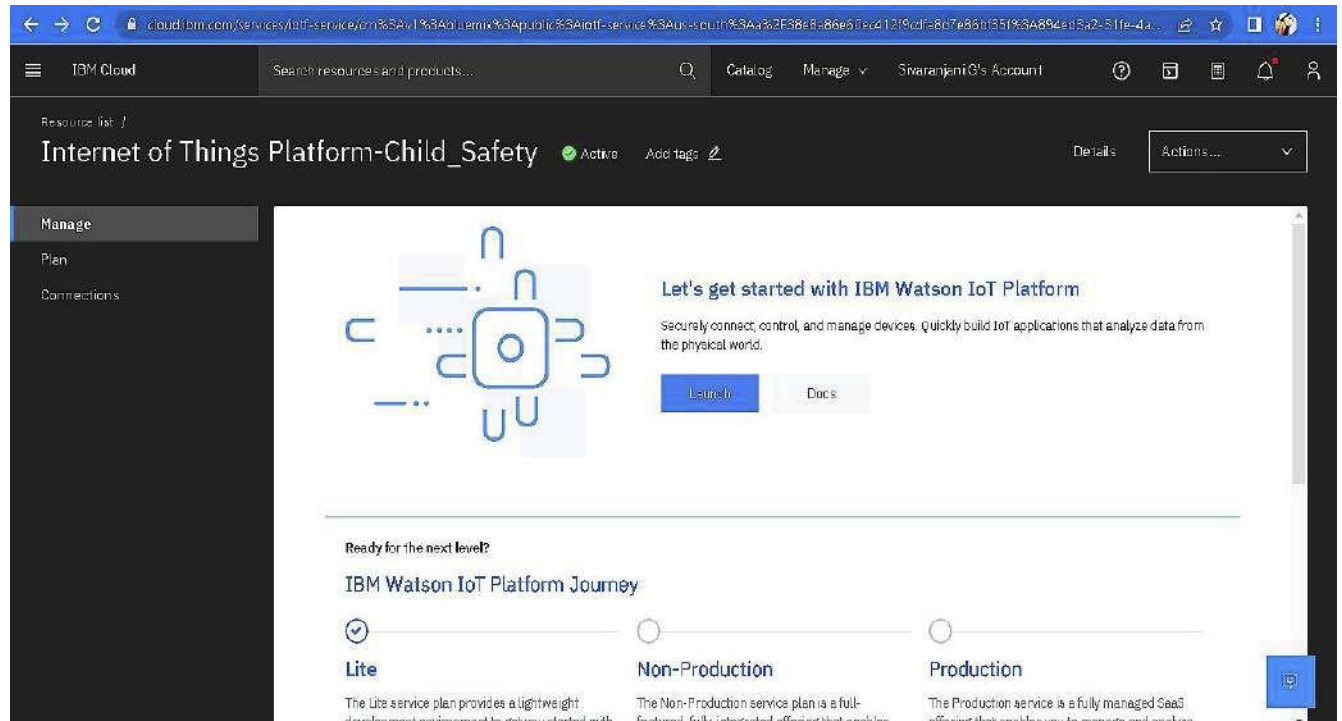

The screenshot shows the IBM Cloud 'Internet of Things Platform' creation page. The 'Create' tab is active. On the left, a sidebar lists metadata: Type (Service), Provider (IBM), Updated on (08/16/2022), Category (Internet of Things), Compliance (IAM-enabled), and Location (Frankfurt, London, Dallas). The main content area has 'Select a location' with a dropdown set to 'Frankfurt (eu-de)'. Below it, 'Select a pricing plan' shows a table with one plan, 'Lite', which is selected. The summary on the right shows 'Internet of Things Platform' as a free service in Frankfurt on the 'Lite' plan. A checkbox for 'I have read and agree to the following license agreement(s): Terms' is unchecked. 'Create' and 'Add to estimate' buttons are at the bottom.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric. Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

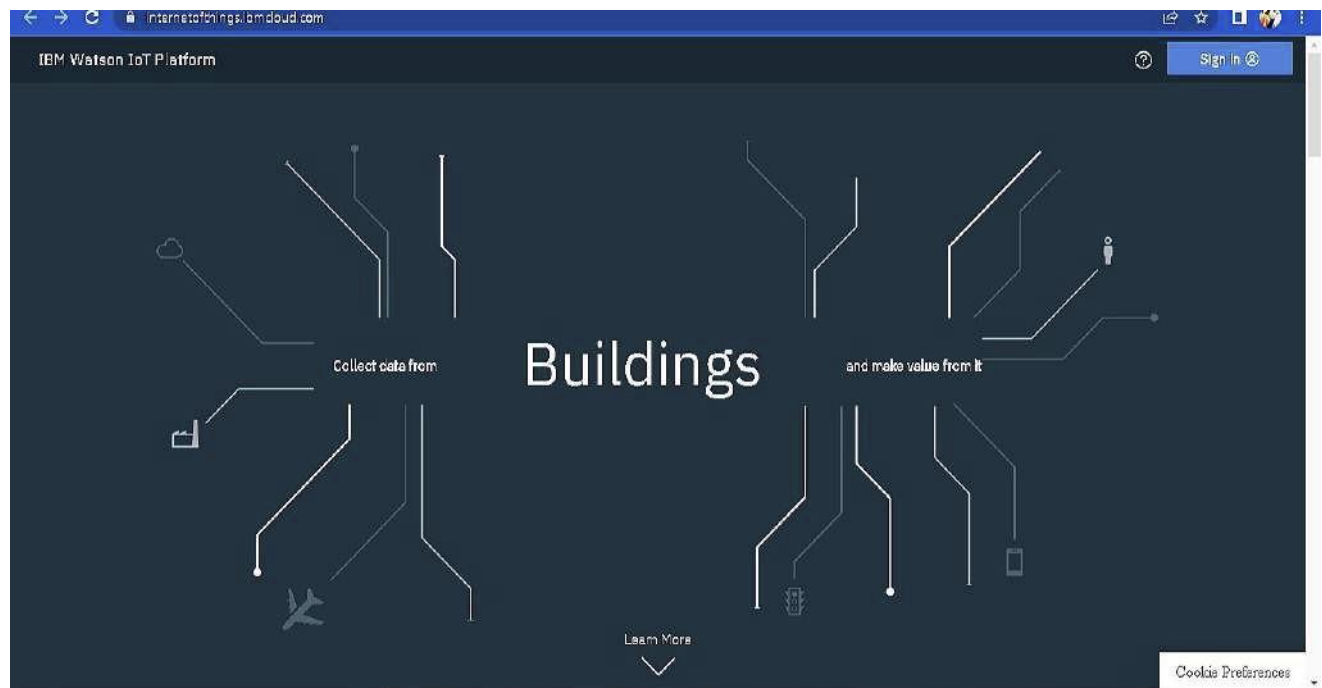

This screenshot shows the same IBM Cloud 'Internet of Things Platform' creation page, but with 'Dallas (us-south)' selected in the location dropdown. The 'Lite' plan remains selected in the pricing plan table. The summary on the right now shows the service is located in Dallas. The checkbox for 'I have read and agree to the following license agreement(s): Terms' is now checked. The 'Create' button is highlighted in blue, indicating it is ready to be clicked.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric. Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

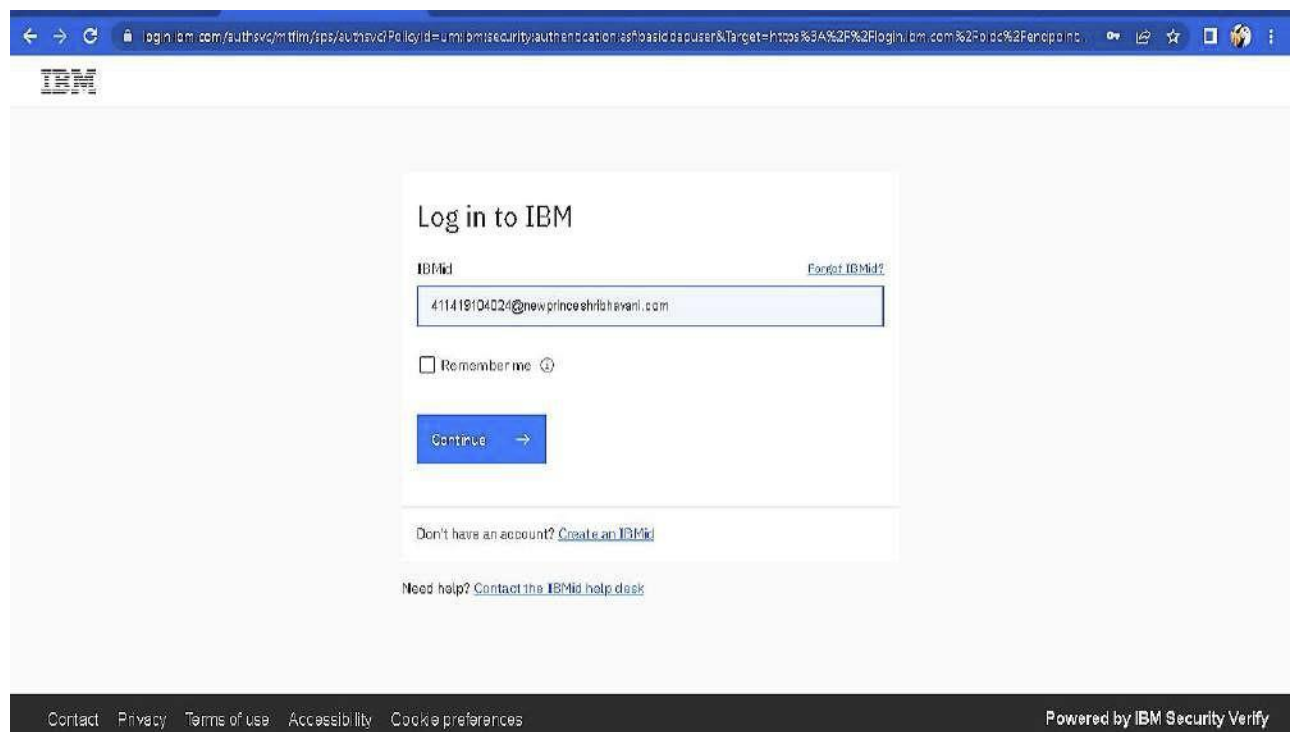

7. Internet of Things Platform Child_safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other services)

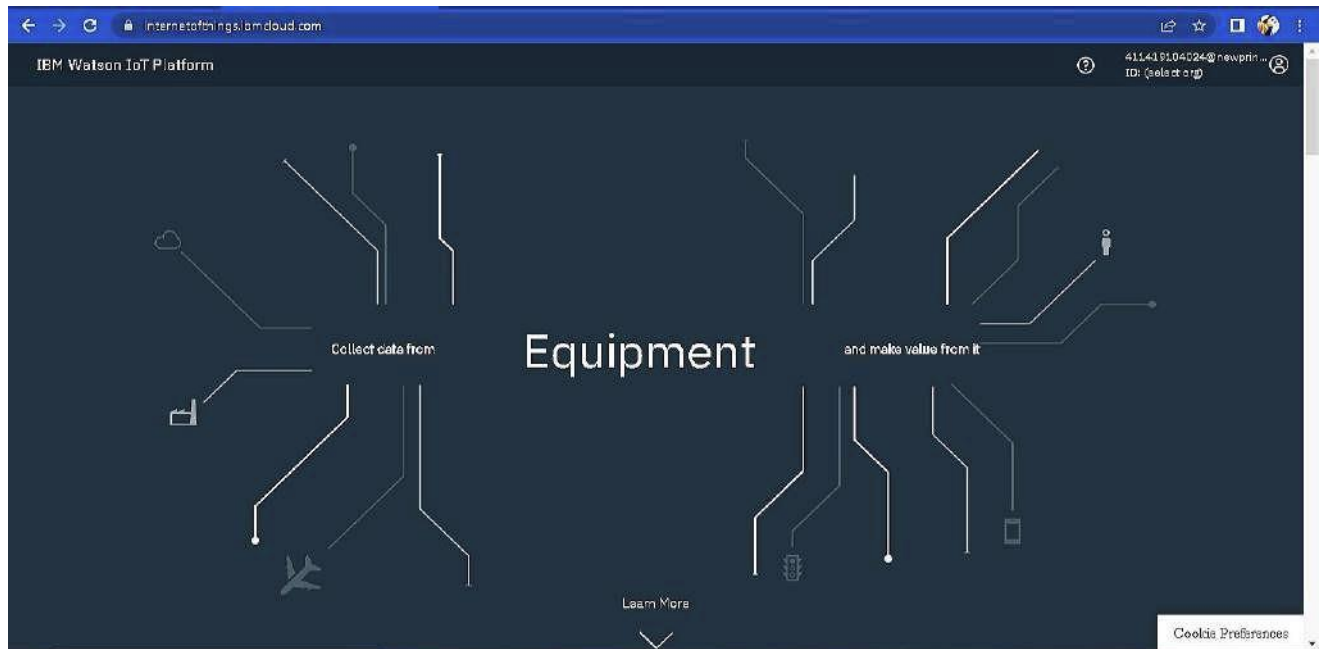

8. Clicking on the launch button in the manage tab, it will open to this

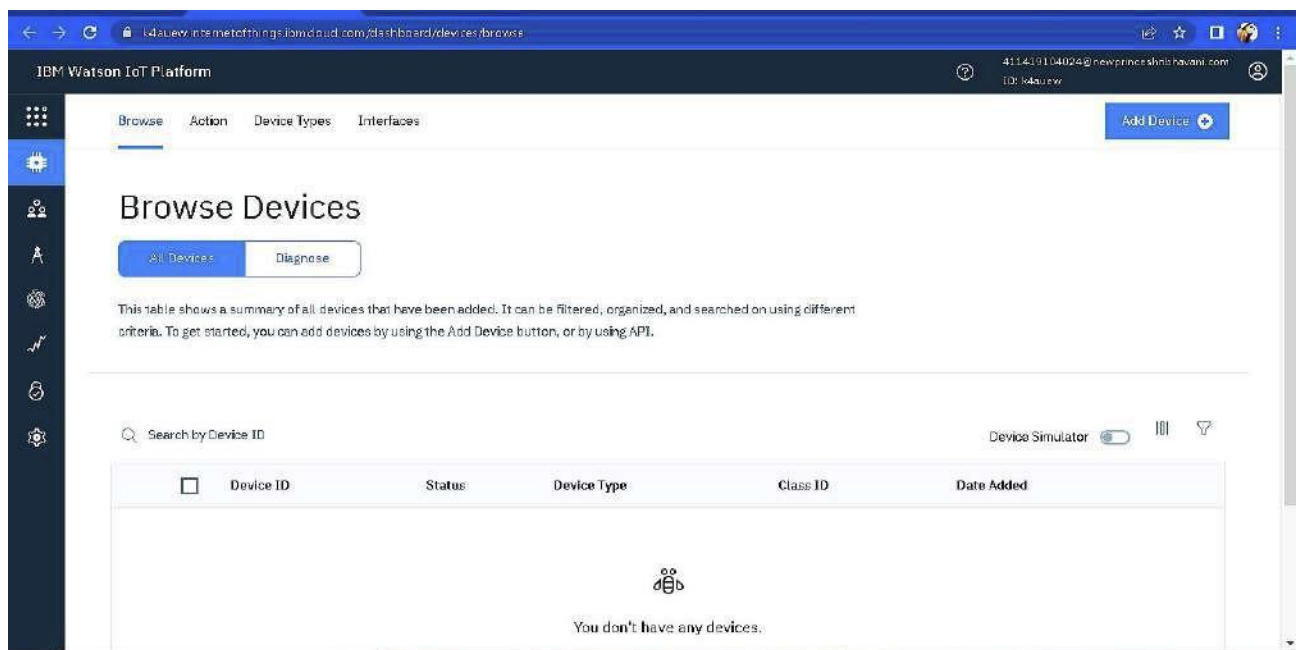

9. Enter the details to sign in to the Watson Cloud to create a device

10. Once logged in the name will be displayed and it goes back to the first page

11. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices

12.The member tab is add the teams members to work in the platform

14. Click on the device tab and click on the add device button, then give the device type and device id and click next

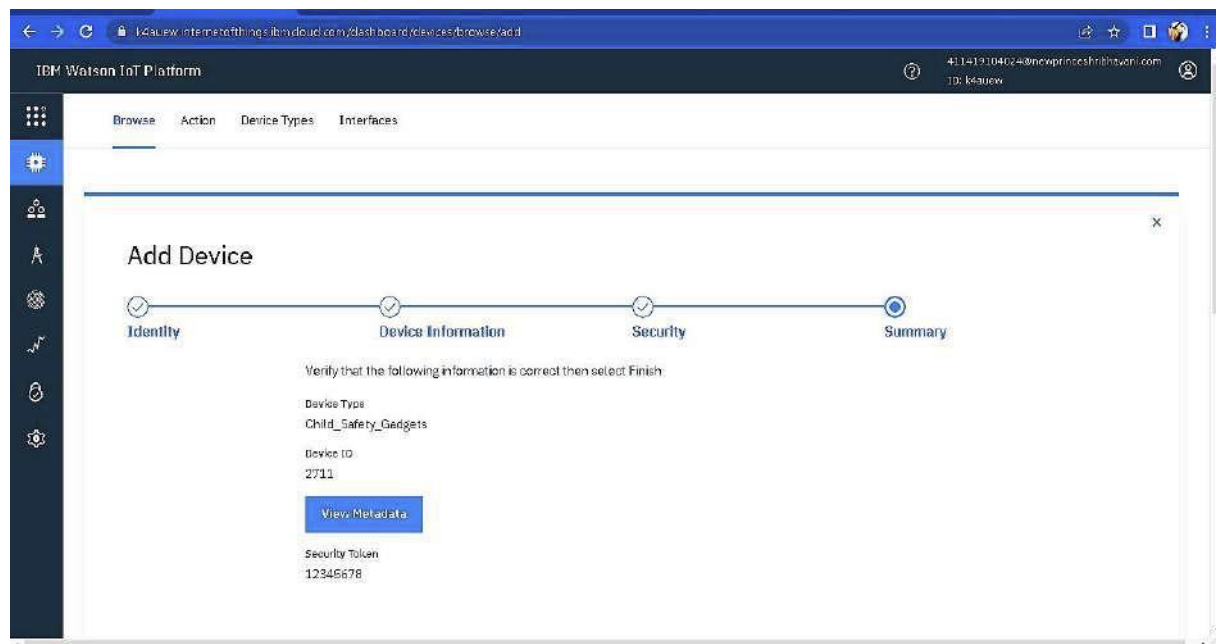

The screenshot shows the 'Add Device' page in the IBM Watson IoT Platform. The page has a dark blue header with the IBM Watson IoT Platform logo and a user profile. A sidebar on the left contains various icons. The main content area has a breadcrumb trail: 'Browse' > 'Action' > 'Device Types' > 'Interfaces'. Below this is a progress bar with four steps: 'Identity' (selected), 'Device Information', 'Security', and 'Summary'. The 'Identity' step is active, showing a form with two fields: 'Device Type' (with a dropdown menu) and 'Device ID' (a text input). Below the form are 'Cancel' and 'Next' buttons. At the bottom of the page, there is a 'Browse Devices' section with 'All Devices' and 'Diagnose' buttons.

15. This page to enter extra details and of the hardware

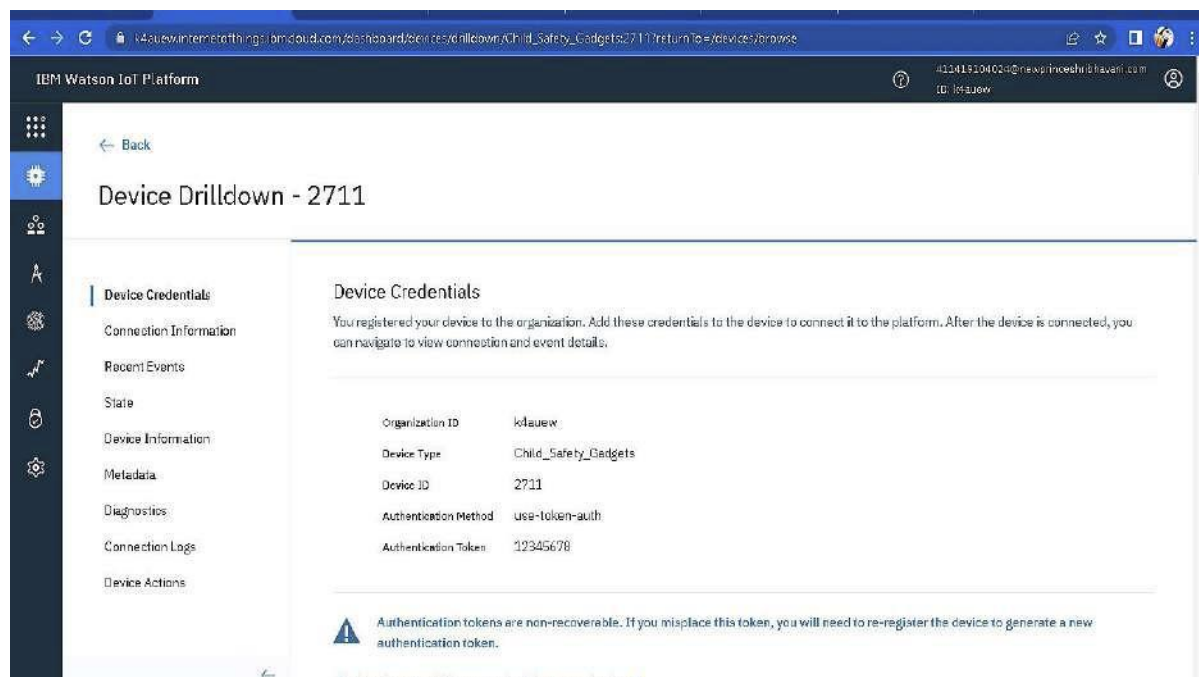

The screenshot shows the 'Add Device' page in the IBM Watson IoT Platform, now at the 'Device Information' step. The progress bar shows 'Identity' as completed and 'Device Information' as the current step. The 'Device Information' step is active, showing a form with several fields for entering device details. The fields are arranged in two columns: 'Serial Number', 'Model', 'Description', and 'Hardware Version' on the left; 'Manufacturer', 'Device Class', 'Firmware Version', and 'Descriptive Location' on the right. Each field has a text input box. Below the fields is an 'Add Metadata' button with a plus icon. At the bottom of the page, there are 'Back' and 'Next' buttons.

16. Clicking next it goes to the security where we do authentication token id.

17. Clicking on next it goes to the summary of the device then click finish

18. The device credentials will be displayed with all the details

Safe the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

19. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

Connection Status Disconnected

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

20..The Boards will display card for the project.

RESULT:

An IBM Watson cloud for IoT and a device is created
